

AgileXRM brings true **Business Process Management** and **Dialogs** to the **Microsoft Power Platform / Dataverse** delivering its Low-Code promise

How fast can you create Business Apps to respond to new requirements or changes?

- Create **explicit process models** that Users understand
 - Deliver **outstanding Customer Experience**
- Drive operations with **real-time visibility**: who must do what, when and how, with alerts to ensure activities do not become overdue
 - Unprecedented **User Adoption** while keeping data clean

Agility for Dynamic Businesses

MANAGE

MONITOR

MODEL

EXECUTE

Continuous Improvement

REDUCE

Time to Market

Create reliable solutions **in a fraction of the time** compared to doing it without AgileXRM. Maintain and Evolve them even faster!

Project Risk

Avoid developing in Power Platform and lower the dependency on high-skill resources.

Total Cost of Ownership

Beside the cost reduction achieved by Automation, a **Manage-By-Process** environment with optimal User Experience, minimizes both the user training requirements and the number of process errors with a direct impact on lowering operational expenses.

MAXIMIZE

Personalization

Visually explicit processes, forms and dialogs with rich functionality created with **drag & drop**.

Adaptability

Built to **deal with change**, as that's the nature of competitive business. Changes that drive continuous performance improvements and new requirements are easily included at the speed the business requires.

User Adoption

Engage your users with a familiar UI that dynamically shows the relevant info to perform the task. Empowering people to **do it right first time, every time**.

Connect to External Systems

Open up your data to outsiders who play a part in your business processes

Easily perform Continuous Process Improvement

Simply deploy the new model and have running processes migrate to the new definition

Dynamically Change Process Flow

When unforeseen situations occur: Rework, Reassign, Rollback, Cancel, Suspend, etc.

Leverage Existing Technologies

making it future proof with an unhindered migration path

 **AGILEXRM** provides the **unique tools to quickly build Business Apps in Power Platform that improve productivity and responsiveness to your Customers**
